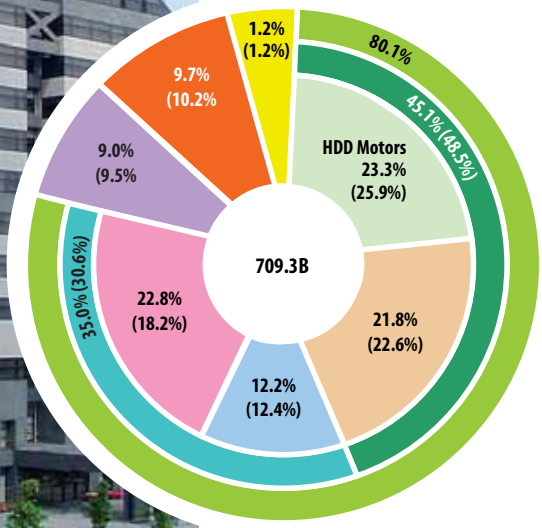
NIDEC Corporation

With annual sales exceeding $8 Billion last fiscal year, the NIDEC Corporation has become the world's dominant provider of small precision, mid-size motor and related drive technologies. Founded in 1973 by current Chairman of the Board and CEO, Shigenobu Nagamori, the NIDEC Corporation has built a portfolio of motor variety that is far reaching and impacts all of us during our daily routine. Regardless if its hard disk drive motors, fan motors for appliances, or automotive related products, the NIDEC Corporation provides the motor and drive technology that help keep our world moving forward.



Motors:

Automotive, Appliance, Commercial & Industrial Products
Motors for automobiles, home electronic appliances and industrial equipment

Small Precision Motors

HDD Motors

Other Small Motors
Optical disk drive motors, OA equipment motors, polygon scanners, MPU cooling fans, game machine fans, PC/communications fans, home appliance fans, automobile fans, vibration motors, brush motors, stepping motors, actuator units

Auto
Vibration motors, brush motors, stepping motors

Appliance Commercial Industrial
Game machine consoles, MPU cooling fans, PC/communications devices, home appliances, automobiles

Machinery:
Industrial robots, card readers, circuit board testers, high-speed pressing machines, chip mounters, measuring equipment, power transmission equipment, factory automation system

Electronic & Optical Components:
Camera shutters, switches, trimmer potentiometers, processing, precision plastic mold products

Others:
Logistics and services, musical products

NIDEC-SHIMPO

NIDEC-SHIMPO has established itself, as the leading supplier of drive technology and gearing solutions to the industrial marketplace. With traditional roots that began imbedded in the development of mechanical variable speed powertrains, SHIMPO has grown into a more diverse manufacturer of high precision and heavy duty power transmission systems.

Today, NIDEC-SHIMPO is producing more than 30,000 speed reducers per month out of its central Asia-Pacific manufacturing facility. With the marketplace continuing to demand higher levels of value, NIDEC-SHIMPO continues to push forward in the development of high quality, dependable products at a price point that allows customers to be competitive in the global arena.

Product Overview

SHIMPO has invested heavily in developing higher precision gear reducers to meet the evolving needs of our global customer base. This effort has led to the development of our ABLE product line, a complete offering of planetary speed reducers specific for servo-motor applications.

Our production capacity and relationship with our sister company, NIDEC-MOTOR, gives SHIMPO the ability to design and manufacture custom gear sets or integrated gearmotor assemblies. For any potential mid to high volume gear application, our OEM customers can leverage our manufacturing expertise to bring to market the most cost effective design.

Power Transmission Solutions:

- **High-Precision Servo Grade Gear Reducers**
- **Industrial Duty Speed Reducers**
- **Mechanical Adjustable Speed Drives**
- **OEM Gear Sets and Gearmotor Assemblies**

Kit Assembly Center

NIDEC-SHIMPO AMERICA launched a kit build program at their Itasca, IL facility to serve the North American market. The Kit Build Center can assemble many of our planetary and cycloidal series reducers in most major ratios within a 2 to 4 day period.

The Kit Build Center tests every assembled reducer to make sure that all performance specifications are met. The battery of tests includes load testing, noise measurement, and backlash measurement, the same tests run by our manufacturing facility. The new Kit Build Center provides an excellent, quick, turn-around solution for Distributors and OEMs.

A Competitive Advantage to Our Customers:

- **Availability of reducers within 2-4 days**
- **Complete performance testing on every assembled unit**
- **Excellent flexibility (frame and ratio combinations) for prototype orders or custom automation projects**
- **Adapters for most motor mounting configurations**
- **Emergency replacement for equipment in the field**

Global Connections

NIDEC-SHIMPO's ultimate goal is to provide the highest quality products and service to our customers throughout the world. To support the needs of a constantly expanding and evolving global economy, we continue to invest heavily in extending the footprint of our support network and distribution channels.

NIDEC-SHIMPO has more than 2,000 employees with a presence across five continents. We continue to expand and improve our global capabilities in order to better serve the needs of our OEM customers in an increasingly competitive environment.
